Dear Sir:

Applicant agrees in part with the Examiner's Statement of Reasons for Allowance in that the prior art of record fails to disclose the limitations noted by the Examiner. However, the Examiner's statement does not reflect all of the language of each of the allowed claims. Further, the Examiner's statement includes inaccuracies with regard to the claim language. For example, paragraph 4(a) of the Examiner's

reasons refers to "an UP pulse signal" in claim 1; however, claim 1 actually recites "an  $\overline{\text{UP}}$  pulse signal." In addition to these observations, the totality of the language of each claim provides additional reasons for the allowance of each claim.
